

# Minority Groups

# Minority Groups

This is a term used to define people of a particular group that is different and somehow separate from the dominant group. This difference can be due to social class, background, race, gender, sexuality and appearance.

Bullying, in many cases, is often a result of a person from the dominant group choosing to harass a person from a minority group because of these differences.

1. **Why might a bully find it easier to pick on a person from a minority group?**
2. **Do you think all bullies are from a dominant group? Why might a person from a minority group also become a bully?**
